Since 1992, the highest quality contractor vacuums

Nilfisk
ALTO
Why Compromise

Attix vacuums are used by Jiffy Lube Centers and Mercedes/BMW dealers due to their durability and power.

The perfect solution for professionals on the move.

The ATTIX 30 is the new and compact generation of the Attix series by Nilfisk ALTO - representing a new possibility of achieving superior suction power in a durable and flexible wet/dry machine.

Plus, the AutoOnOff socket on the AS/E models allows the Attix 30 to be used in conjunction with electric power tools, and the MultiFit accessory system gives the ultimate flexibility for different tasks.

Tool connectors available to connect vacuum hose to sanders, saws, etc.

Constant high suction performance - Push&Clean technology for fast and simple filter cleaning.

If you are working with fine dust, you are familiar with the dreaded task of cleaning clogged filter cartridges to restore normal suction performance.

With Push & Clean, all you have to do to clean the filter is block the inlet fitting or the hose, and push and release the filter cleaning button. Powerful air pulses will clean the filter gently. The dirt is blasted off the filter and the suction performance is high again - you are back to work in no time.

Vacuums are sealed to meet RRP standards. HEPA filters exceed EPA standards for HEPA filtration

Ergonomic and sturdy grip for easy transport and cable storage.

Improved accessory storage and tool deposit.

HEPA vacuums come with HEPA Certification Document

ATTIX 30

- superior suction power in a compact and flexible design

Attix 30

- Compact, ergonomic, and powerful
- Push & Clean
- Washable PET fleece filter
- Silent Power
- 8 gallon container
- MultiFit accessory system
- HEPA filter model available

Attix 30 AS/E

- Compact, ergonomic, and powerful
- Push & Clean
- Washable PET fleece filter
- Silent Power
- 8 gallon container
- MultiFit accessory system
- **Auto Start** for Electric tools
- Speed Control

HEPA vacuums come with HEPA Certificate

When you need container volume!

The ATTIX 50 is the solution for the demanding user with a high frequency of cleaning. User-friendly operation and functional design ensures better performance and reliability, with wet and dry capabilities.

The ATTIX 50 series gives you the possibility to choose between the XtremeClean filter cleaning system and the Push & Clean filter cleaning system, Auto Start for electrical and pneumatic power tools (AS/E and AS/PE models), anti-static capability, and MultiFit for all accessories.

XtremeClean is setting new standards.

Compact design and high performance are key features in the XtremeClean technology, used on the ATTIX 50 series. With the ambition of setting new standards, the two curved flat nanotechnology filters maximize the container volume and improve efficiency even more.

A servo motor controlled Y-FLAP ensures precise reversed air flow and prevents power loss during operation.

Start the vacuum - the filter is immediately cleaned automatically and every 20 seconds, while you work! There is no need to interrupt your work to clean the filter.

You concentrate on your task, and XtremeClean will take care of the filter cleaning.

Fleece bag now available!

Nilfisk vacuums are known for their durability and power. Used by hospitals, contractors, painters, and NASA to clean the space shuttle cargo bay.

ATTIX 50

- superior suction power and new innovative features
